

Quality Manufacturing Services, Inc.

400 Caring Drive, Suite 1010
 Lake Mary, Florida 32746
 407-531-6000 • www.QMSCFL.com

1. **Description.** The QMS Fast Track program is an aggressively managed, expedited manufacturing service offering for kit-build projects only (customer providing all materials).
2. **Communication.** QMS will assign a senior manager as your Fast Track Coordinator (FTC). The FTC will be the Single Point of Contact for QMS and will coordinate with your assigned counterpart.
3. **Commitment.** QMS will commit to a delivery date at time of quotation and provide a timeframe(s) for project start. Start time windows are based on factory capacity at time of quote. If project award/startup is delayed, QMS will coordinate with your assigned counterpart for an agreed upon delivery date.

4. **Data.** Electronic design data is required in advance of materials to procure necessary tooling (SMT Stencils) and for Engineering Process development. This includes valid CAD/Gerber files, BoM, Assembly Drawing.
5. **Materials.** QMS will audit kits upon receipt and advise of concerns. Start time will commence after all parts are received in good condition. Electronic components must be provided to QMS in new condition and in machine-capable formats (reels, trays, tubes). Bulk materials must be approved by the FTC.
6. **Questions.** Issues that arise during production will be raised by the FTC and coordinated with your assigned counterpart for prompt resolution. If the issue can not be resolved promptly, the FTC may advise of additional time required to complete the project..

FAST. SMART. SIMPLE. GUARANTEED.
